Allergies/sensitivities & special dietary needs

Please note that some of the children at the centre have allergies. Some of these allergies can be potentially life threatening, and some can result in some discomfort.

To avoid children being exposed to anything that could harm them we would ask you to;

- (1) Inform us of any allergies/sensitivities or medical conditions that your child suffers from, and keep your enrolment details updated on an ongoing basis.
- (2) Inform us of your child's special dietary requirements.
- (3) Provide the centre with medicines and written consent on our SPOSCI 'permission to administer medication' forms. These will be locked in the poisons/medicine cupboard.
- (4) Ensure that your child understands that they should only consume the food you provide for them, or the food that SPOSCI provides for them if they have allergies or sensitivities to particular foods.
- (5) If your child has an epi pen please give it to the Coordinator. It will be placed on the Coordinators desk and taken in the first aid bag on excursions. It is vital that it is readily available to staff at all times.
